

## Variety's **My Bike**® Program, **My Stroller**® Program, & **My Voice**® Program:

All equipment is provided at **NO COST** to families that meet the program's eligibility requirements.

Variety's **My Bike**® Program currently provides eligible children with disabilities with a Rifton adaptive bicycle (with Rifton accessories) that is individually customized, so they may have the freedom of a bike and the joy of riding alongside friends and family.

**"A bike would help him maintain his current abilities with walking and self-care, and it'll keep him active and strong. He'll be able to be social with friends and ride bikes with them versus being pushed in his wheelchair. He just wants to be like others, but he's grateful for all he has and his general health. He would simply love his own bike."**

Variety's **My Stroller**® Program currently provides a Kid Kart® Mighty Lite adaptive stroller to eligible kids with disabilities for mobility and/or safety in the community.

An adaptive stroller allows for easier "on-the-go" mobility and participation in daily activities and throughout the community. With an adaptive stroller, kids are no longer isolated, and it has an immediate impact on their lives. For others, a child might need an adaptive stroller to stay safe and secure while out in the community.

**"Kaitlin cannot walk long distance due to her diagnosis. She likes to go out to the stores, but most of the stores do not provide a special needs cart. Right now, if I must go anywhere, she walks and wants to sit down after a few minutes. In a big store, it's hard to find a bench. This stroller will make a big difference in where we can go."** *-Tracy, mother of Kaitlin (right)*

Variety's **My Voice**® Program provides a communication device (i.e. currently a restricted iPad with a prescribed communication app) to eligible children with a communication disorder to give them a voice at all times – and enabling kids to express their thoughts, feelings, wants, and needs.

**"Mason has a delay in his speech. While he is doing amazing and trying to talk more and more every day, he continues to get frustrated when he is trying to tell or ask for things and others don't understand him. Having a device that Mason will be able to communicate from will help him express his needs and will also improve his speech."** *-Nicole, mother of Mason (left)*
